Office 2013*	April 10, 2018	April 11, 2023

Questions and Answers

Q. How can I change my Windows XP, or Windows 7 to another operating system?

A. We can do that for you, and in most cases, you don't have to go out and buy a new computer, and you can continue to use your existing computer. We will install one of the safest operating systems around, called UBUNTU, which has built in security, word processing, and many other features that are FREE. We only charge a flat rate of \$175.00 to completely backup all your files, and then install the new system on your computer. It is that simple.

Q. Is UBUNTU any different than Windows?

A. UBUNTU is safer, and you will no longer have to worry about your computer getting viruses, malware, or other security threats. UBUNTU is even faster than Windows when you use it.
