

The next best thing to a mountain spring.

Introducing Arrowhead's Puritap 2400R Drinking Water System. It will give you more than a convenient supply of great-tasting water. You'll also get high-quality water processed the same way a lot of bottled water is. Only for less. Right under your kitchen sink.

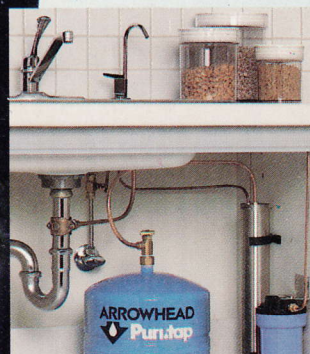

And we'll install it free.

Right next to your existing faucet. Call us at 242-2334. We rent or sell Puritap reverse osmosis and carbon filter systems for every need.

And each one is a new direct line to great-tasting water.
