

"It's my first corn born and bred for your hot air popper."

"It took years in the field to create my new Gourmet® Hot Air Popping Corn, but it was worth it.

My special kernels were born to outperform other popcorn brands in hot air poppers. In fact, mine leave you fewer unpops than any other major brand in the best-selling popper. And mine pop lighter and fluffier to taste lighter and fluffier, too.

Just pour my new Gourmet® Hot Air Popping Corn in your hot air popper and taste the tenderness. You'll see why good breeding makes all the difference or I'm not..."
